ANNOUNCEMENT

Dummer Academy is situated in the town of Newbury, County of Essex, in one of the healthful and beautiful country districts of the famous North Shore of Massachusetts Bay. The location is especially well suited to a boarding school. There are no public attractions near. The villages of Byfield and Ipswich are three and six miles distant while the city of Newburyport is four miles away. These places have stations on the Boston & Maine Railroad. They are connected with the Academy by an electric railway.

The Academy offers all the advantages of a secondary school. Its work is thorough, systematic and progressive. While it prepares pupils for entrance to colleges and technical schools; yet it offers an exceptionally complete course for those who have no further study in view. The needs of the individual are consulted with an aim to develop the best in him. Boys of all ages are received and particular attention is paid to the arrangement of their courses. Pupils of advanced age are given every encouragement to graduate early. The opportunity is offered to any who desire to carry on graduate work. By pursuing one year of graduate study pupils may be prepared to take the Sophomore year of college work.

Girls of the vicinity are permitted to attend the Academy as day students.

The school is primarily a home school. There are as few rules as may be consistent with good discipline. Great freedom of action is allowed. Students are required to be courteous and punctual; to keep their rooms and personal appearance neat; to attend church regularly, and to write home once a week. They are expected to act in a gentlemanly manner at all times.

A separate home is maintained for the younger boys, under an instructor and his wife.

Daily exercise is required, as both healthful and manly. Out-of-door sports are practiced when the weather allows; on stormy days the exercise is in the gymnasium. Athletic sports of all kinds are judiciously encouraged. The Parker and Mill rivers, which enclose a part of the Academy farm, afford excellent bathing and boating.

At stated periods on each day the student studies under the supervision of an instructor.

South Byfield is remarkably healthy. Cases of sickness have been very few. However, when occasion requires, prompt and efficient care is given. Several competent physicians and professional trained nurses are within easy reach of the school. The health of each boy is cared for as carefully as are his studies. To this end regular hours for rising and retiring and for daily study and exercise are prescribed.

It is believed that ability to use correctly the English language is of primary importance. Therefore, the Academy offers a course in Daily Themes which is prescribed for all pupils throughout the year. These themes must be short, and may be written upon any subject. The chief purpose is to teach fluent and correct expression. Public declamation is required of every pupil with the object of encouraging good composition, proper bearing, clear pronunciation and suitable expression. Special mention is made of those who excel.

The Dummer Forum is a debating society made up from mem-

bers of the school. Its meetings occur bi-weekly. It serves to encourage public address and offers practice in parliamentary rulings.

The Dummer News is published monthly during the school year. It is purely local, confining itself to the affairs of the school, and aims to interest pupils and friends, particularly graduates who may wish to keep in touch with the Academy.

The Dummer Academy Athletic Association cares for the athletic interests of the school. It has regular sessions for business once a month.

The Quesacunquen Golf Club, founded by students and teachers, has laid out a golf course. Golf has become one of the regular sports of the school.

At regular intervals lectures of interest and value on educational subjects are given by members of the faculty. Several public lectures are given each year under the auspices of the Academy. This year the course included:—Macbeth Recital, Marshall Darrach of New York. Daniel Webster, Melvin P. Holbrook. Abraham Lincoln, Perley L. Horne. John Greenleaf Whittier, Lyman Kenneth Clark. Nathaniel Hawthorne, William Dudley Sprague; Mark Twain, Paul Capron.

From the income of the Moody Kent Fund, founded for the purpose, six gold medals are awarded for the best standing in each of the following branches:—English; Classics (Greek and Latin); Modern Languages (French and German); Mathematics; Science; History. These prizes are distributed on Commencement Day.

June 19, 1900, the prizes for the year were awarded as follows: English, Roy Wilder Johnson; Classics, Frederick Harrison Johnson; Modern Languages, Nellie Anstice Adams; Mathematics, Nellie Anstice Adams; Science, Joseph Wilkinson Crowe; History, Katherine Agnes Cavanagh.

Applicants for admission to the Academy must be recommended by their latest instructor for scholarship and character.

Applicants for the Junior Class are examined in Arithmetic, English, Grammar and Geography. Pupils will be received into the Preparatory Class without examination. Written examinations are held each month. Reports made up from the daily work and monthly examinations, together with reports of conduct, are sent to the parents or guardian of each boy.

The rate of tuition is \$500 a year; day scholars, \$75. A laboratory fee of \$5 is charged all students taking the course in Physics or in Chemistry. All bills are invariably due at the beginning of each term.

A deposit of \$25 is required at registration to cover incidental expense, breakage, and the like. A careful account is kept and at the close of the year is sent with the balance, if there is any, to the parent or guardian.

Books will be provided for those who do not care to purchase their own. A moderate rental will be charged to cover the loss in wear.

Each pupil should bring three sheets for single bed, six pillow slips, six towels, six napkins, one pair blankets, one napkin ring, one clothes-bag, all carefully marked with his initials. Rubber-boots, mackintosh and gymnasium suit should also be brought.

THE COMMONS.

COURSES OF STUDY

The courses of study have been carefully arranged to meet the requirements for admission to all the leading colleges and scientific schools.

The development of the elective system in choice of studies to be presented for examination for entrance to Harvard College has rendered it advisable to extend the elective system in the secondary schools. The number of courses in English, History, and the Sciences have been increased.

In English, advanced students can anticipate their college Freshman English.

In History, a course in "mediaeval and modern European History" is given. This course is conducted by lectures, recitations, conferences on outside reading, and by special reports. The opportunity is also offered to study carefully a special field of History.
